**BEFORE YOU SLAM IT FRAM IT**

FRAM TOUGH GUARD, FRAM, FRAM AIRHOG

**Watch the Show**

May 1, 2006

**Robo-roaches that really move**  
They're hand-held, six-legged robots that skitter around at breakneck speeds. Researchers at Stanford University have taken cues from the insect world for making these speedy robo-critters. Click to find out more...

[video](#)

**Military monster truck**  
Engineers at Carnegie Mellon University have unveiled the "Crusher" - 6.5 tons of go-anywhere military muscle. Is this kind of driverless, autonomous vehicle the future of ground combat? Click to find out more...
